

## TPUP-LINE Data Sheet

TPUP-LINE products are made of thermoplastic polyurethane Covestro Desmopan 3055DU. It has good physical properties and is suitable for demanding applications in almost all municipal and industrial areas. The material was tested for fire safety.

Please note the respective product information, such as installation instructions and care instructions. We assume no liability for the correctness, topicality and completeness of the data.

## TPUP / P1

Tactile floor plate made of polyurethane.

Sandblasted surface with 3 longitudinal ribs.

The edges of the guiding ribs are inclined at a 45 or 90-degree angle.

Height of base = 2 mm, height of ribs = 3.5 mm.

Dimensions in mm, width x length x height = 150 x 450 x 5.5

Please note the respective product information, such as installation instructions and care instructions. We assume no liability for the correctness, topicality and completeness of the data.

## **TPUP / P2**

Tactile floor plate made of polyurethane.

Sandblasted surface with 6 longitudinal ribs.

The edges of the base and the ribs are inclined at a 45-degree angle.

Height of base = 2 mm, height of ribs = 3.5mm.

Dimensions in mm, width x length x height = 300 x 300 x 5.5

Please note the respective product information, such as installation instructions and care instructions. We assume no liability for the correctness, topicality and completeness of the data.

### **TPUP / P3**

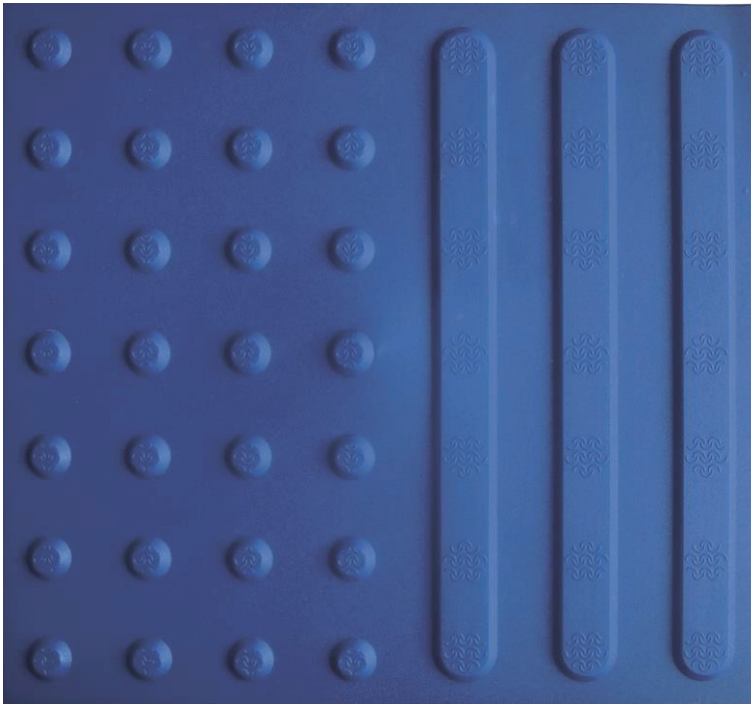

Tactile floor plate made of polyurethane.

Sandblasted surface with 3 longitudinal ribs and a studded warning field.

The edges of the base the ribs and the studs are inclined at a 45-degree angle.

Height of base = 2 mm, height of ribs/studs = 3.5 mm.

Dimensions in mm, width x length x height = 415 x 385 x 5.5

Please note the respective product information, such as installation instructions and care instructions. We assume no liability for the correctness, topicality and completeness of the data.

## **TPUP / K1**

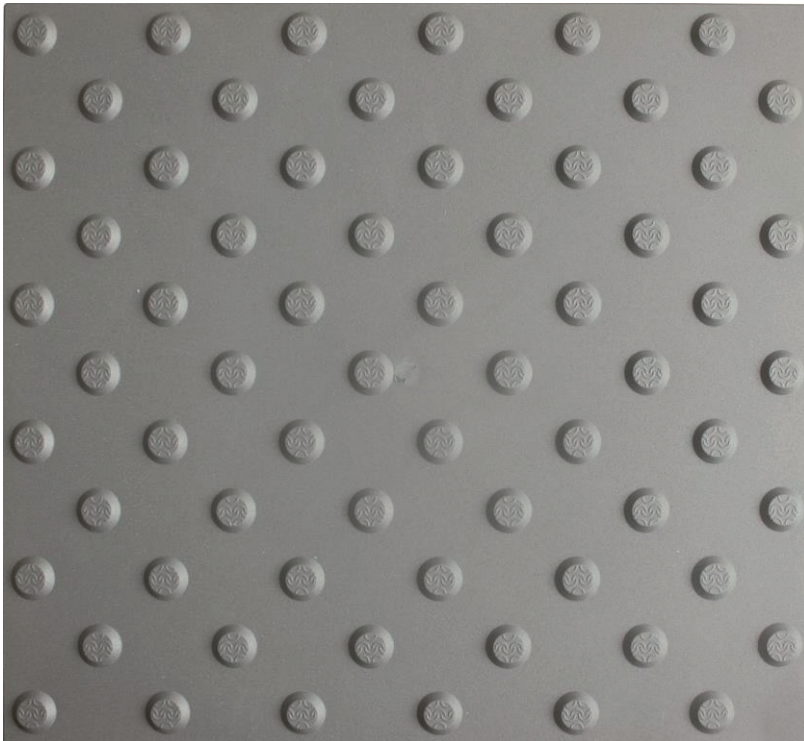

Tactile floor plate made of polyurethane.

Sandblasted surface with studs in diagonal arrangement.

The edges of the studs are inclined at a 45-degree angle - trapezoid profile.

Height of base = 2 mm, height of ribs/studs = 3.5 mm.

Dimensions in mm, width x length x height = 450 x 412.5 x 5.5

Please note the respective product information, such as installation instructions and care instructions. We assume no liability for the correctness, topicality and completeness of the data.

## **TPUP / K2**

Tactile floor plate made of polyurethane.

Sandblasted surface with studs in diagonal arrangement.

The edges of the studs are inclined at a 45-degree angle - trapezoid profile.

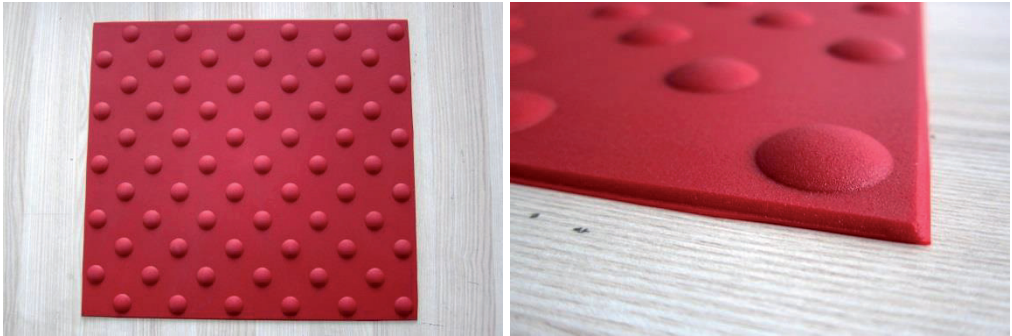

Height of base = 2 mm, height of ribs/studs = 3.5 mm.

Dimensions in mm, width x length x height = 300 x 300 x 5.5

Please note the respective product information, such as installation instructions and care instructions. We assume no liability for the correctness, topicality and completeness of the data.

All warning plates are also available with dome-shaped studs:

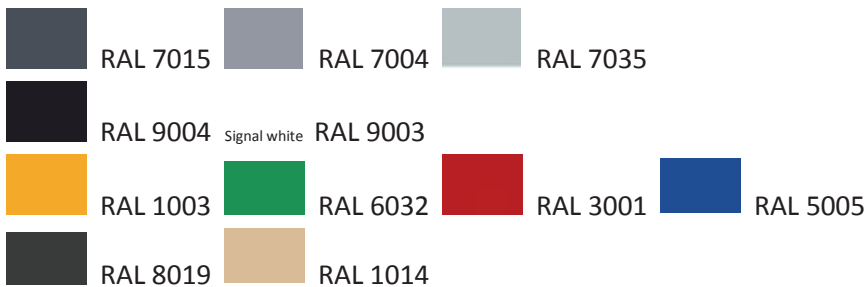

All TPUP-LINE plates available as self-adhesive:

**Gerband 941** **3M 93020LE** **3M VHB 4936** **3M VHB 5925** **Bimeks ACR064**

Standard available colours:

Please note the respective product information, such as installation instructions and care instructions. We assume no liability for the correctness, topicality and completeness of the data.
